

RM-10806 + Review / Point of View / RE-Re-Review

Point Number 3 was addressed in part in RM-10620, with the Commission has failed to bring to a vote based upon merit to convert the licenses over to the next class! A number of ham's want "Metit" issue's drafted into part 97 to prevent rule breakers from up-grading just by passing the test!

Barn Yard Talk, Over Powered Stations, and Communications of a nature that would cause QRM or even QRN is the issue of Merit.

Putting a upgrade under review by the Hollingsworth CREW, or the "CHIEFS" of the WTB for poor station operation, should be part of the upgrade Merit requirement! The Hollingsworth CREW this includes the "OO's" has made 75 m phone better, and still is trying to make 20 m better!

The Hollingsworth CREW in most case of minor violations have used the "ELEMER" mode first, followed by gradual stronger enforcement if stations did not correct issues!

The new influx of HF hams from the TECH class, and off the street will Tax the enforcement system, but ham radio will go on and get better!

CW should be preseeded, but not as a road block to a General license.
